Working Papers

"Global Financial Integration and Productivity: The Role of Risk Sharing"
with Takaaki Sagawa *(Job Market Paper)*
We study how global financial integration affects aggregate productivity through risk sharing and the allocation of capital. Using a small open economy model with heterogeneous capitalists who choose between producing and investing, we show that the productivity effects of financial integration depend on which firms it draws into production and on the depth of domestic financial markets. Foreign participation in domestic equity markets shifts part of the country's aggregate risk abroad, lowering the risk premium and the hurdle rate for production. This raises investment and output but also draws less productive capitalists into production. An expansion of domestic financing capacity

instead allows productive firms to scale up and displace marginal producers. We validate these predictions using the emerging-market equity liberalizations of the 1980s and 1990s, which were followed by equity price booms and more listed firms, and by slower TFP growth where the equity price booms were larger. In the calibrated model, liberalization alone raises output only temporarily and lowers TFP, while liberalization accompanied by deeper domestic financing raises both.

Fellowships & Awards

Ph.D. Fellowship, *Kellogg School of Management, Northwestern University* 2021 — Present
Tinbergen Full Scholarship, *Tinbergen Institute* 2017 — 2019

Teaching Experience

FINCX431 EMBA Macroeconomics (Prof. Janice Eberly), *Northwestern University* 2026
FINC-473 MBA Macroeconomics (Prof. Nicolas Crouzet), *Northwestern University* 2025
FINCX431 EMBA Macroeconomics (Prof. Nicolas Crouzet), *Northwestern University* 2024
Advanced Mathematics (Prof. Florian Wagener), *Tinbergen Institute* 2018

Research Experience

Research Assistant for Prof. Efraim Benmelech, Prof. Nicolas Crouzet, and Prof. Zhengyang Jiang, *Northwestern University* 2022 — 2026

Professional Experience

European Central Bank Frankfurt, DE
External Consultant 2025 — Present

ING Bank Amsterdam, NL
Associate Research & Advice Professional 2019 — 2021

De Nederlandsche Bank (Dutch Central Bank) Amsterdam, NL
Research Intern 2018 — 2019
